Skyware Global signs up Eurosat as exclusive DTH dish distributor

Following the incorporation of Raven, ASC (VSAT & DTH) and Skyware into the newly formed Skyware Global, Eurosat Distribution, who have distributed all three companies' products for many years, are delighted to have signed a distribution agreement with the new company.

Every satellite professional recognises the quality of this industry-leading portfolio of DTH dishes and VSAT antenna systems way back from its origins under the old Channel Master brand, through the Andrew and ASC Signal days and now as part of the new organisation, Skyware Global.

Eurosat's Chairman and CEO, Abbas Arbab-Zadeh, commented "this exclusive distribution agreement for DTH dishes underlines our long-standing commitment to this high-quality range under all its previous brands and now as part of the new Skyware Global company. We are pleased to offer the full range of DTH dishes as well as the full range of VSAT antenna systems and other Skyware Global products to satellite installation professionals and systems integrators throughout the UK and beyond."

The Skyware Global Sales and Marketing Director Allan Kennedy said "we have enjoyed working with Eurosat for many years and look forward to a period of growth as they help us to realise the full potential of our new and exciting company".
